Kimberly D. Bose, Secretary,
Federal Energy Regulatory Commission
888 First Street
NE Room 1A
Washington, DC 20426

RECEIVED
FEDERAL ENERGY REGULATORY COMMISSION
2020 APR 19 10 14:25
SECRETARY OF THE
ENERGY

Ref: docket number P-15056-000

To who it may concern,

As a resident of one of the towns that is being proposed by Premium Energy Holdings as a site for a large dam, resevoir, turbine, and tunnels (reference docket number P-15056-000) for use in pumped storage and generation of electricity, I vigorously object to the proposal and request that the Federal Energy Regulatory Commission deny Premium Enery Holding's application for a preliminary permit. The proposed project is massive, intrusive, and if constructed, likely to damage local lands, roads, and streams and to cause increased turbidity in waters serving as an unfiltered drinking water source for nine million people in New York City. Also, this would be detrimental to our local community by disrupting our economy and displacing residents. The Catskills are a State preserve protected by NY State Constitution. Please do everything in your power to prevent this proposal from moving forward.

Yours truly,

Debra Tomkowid
