Re: Docket Number P-15056-000

Dear Ms. Bose and the Federal Energy Regulatory Commission:

As a resident of West Shokan, a hamlet of Olive and one of the towns that is being proposed by Premium Energy Holdings as a site for a large dam, reservoir, turbine, and tunnels for use in pumped storage and generation of electricity, I vigorously object to the proposal and request that the Federal Energy Regulatory Commission deny Premium Energy Holding's application for a preliminary permit.

The proposed project is massive, intrusive, and if constructed, will damage local lands, roads and streams, and cause increased turbidity in waters serving as an unfiltered drinking water source for nine million people in New York City.

On a personal note, I have been coming to this area for the past 50 years to visit relatives, and have been fortunate enough to actually permanently live in this glorious, rural land for the past 10. I can only imagine the devastation to the beautiful lands, pristine streams, and native wildlife.

Please, please do everything in your power to prevent this proposal from moving forward.

Sincerely,

Barbara Runz
