Dear M. Bose,

By now you have received 100's if not 1,000's of letters re: the hydro-electric proposition for our fragile Catskill area. (destroying my home + many others). I will not list the concerns that have been brought to your attention. I add my voice to their very researched and articulated comments.

My plea is that as stewards of this fragile Earth and its gifts we are called to care for her and be STEWARDS not PILLAGERS.

We petition your help in this horrifying matter by denying the project to go forward in any way.

Most sincerely,

Karen Moller
