Re: Docket P-15056:00

Dear Ms. Bose and the Commission

Although I understand the desire to invest in more sustainable energy, I must protest the proposal put forward by Premium Energy regarding the Ashokan Reservoir in New York.

The Esopus Creak and the Ashokan Reservoir are part of a flowing water supply system to New York City and the proposal to pump a very large amount of water into the Western Basin of the reservoir would put a huge stross on that system, stirring up a lot of sediment, and generally having a negation effection. NYC water supply.

The three site created in 18? In the legally clared to be forever kept as wild forest lands and not leased, sold or exchanged aken by a corporation public or private. It is protected land. This project would cause anable han to the environment, devastating bird and animal habitats, trashing the uscape, pothing the creeks, and generally negatively affecting tourism. In addition, it all require the displacement of people from their homes and properties.

The proposecoligh transmission lines would be an eyesore, require forest clearance, and add to noise polluting

this proposal issues from a private company and private companies are notorious for maintain of their dams, putting the whole area under potential threat as and, Mic. I am in May 2020, when the Edenville and Sanford dams failed. Since 1980 the have been 10 dam failures per, year. We have already seen the destruction wrought by Honor and Iren. I August 2011, and would not want to experience another such flooding disa

I am a resident of Boiceville the Town of Olive and I would urge you to reject this preliminary permit, given to be devastating degative impact it would have on the environment and the local communities.

Carify Worth and and the second
